

43. The composition of claim 42 further comprising injecting 8 million IU interferon-beta on alternate days or 30 µg i.m. once weekly

44. A method of protecting multiple sclerosis patients against brain inflammatory processes, comprising the administration to said patients of the composition of claim 40.

45. A method of protecting multiple sclerosis patients against brain inflammatory processes, comprising the administration to said patients of the composition of claim and 41.

Remarks

It is the applicant's intent to limit the prosecution of this continuation-in-part/divisional patent application to multiple sclerosis. All elements of these claims are supported in the specification.

To accentuate this limitation, the title of this application is also being amended, as recited above.

03/30/2004

Respectfully submitted,

Dr. Melvin Blecher
